Delhi, India | +91-7985263415 | abhishek9833@gmail.com | linkedin.com/in/abhishek-dixit-3336b1358 | github.com/Abhishek5632 | leetcode.com/u/ABHI1DIXIT

PROFESSIONAL SUMMARY

Full-stack developer skilled in the MERN stack — JavaScript, React.js, Node.js, Express.js, and MongoDB — with hands-on experience architecting REST APIs, structuring databases, and crafting responsive user interfaces. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and Database Management Systems, applied through academic and prototype projects covering authentication, real-time features, and role-based workflows. Combines analytical problem-solving with a growth-oriented mindset to deliver clean, maintainable software. Seeking a Software Developer role to contribute technical skills to real-world engineering challenges.

EDUCATION

B.Tech – Information Technology

GL Bajaj Institute of Technology and Management (GLBITM), AKTU 2023 – 2027 | 75%

Senior Secondary (Class XII) – CBSE — 81.17%

Secondary (Class X) – CBSE — 78.83%

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), SQL

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js (Components, JSX, Props)

Backend: Node.js, Express.js – REST API design, middleware, routing, authentication

Database: MongoDB – CRUD operations, schema design

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code, Postman

PROJECTS

TravelBuddy – Find a Travel Companion | HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Socket.IO

- Architected a prototype platform simulating travel-companion matching, letting users create trips and connect by destination and date using demo data.
- Engineered RESTful APIs for user authentication, trip management, companion matching, and real-time chat.
- Integrated MongoDB Atlas to structure and manage demo records for users, trips, chats, blogs, and connections.
- Implemented a responsive multi-page UI with HTML5, CSS3, and JavaScript for dynamic DOM updates and seamless navigation.

Demo: travelbuddy-hluu.onrender.com

CityCare – Civic Problem Reporting Portal | HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

- Constructed a prototype complaint management system demonstrating role-based workflows across user and admin dashboards, from submission through resolution.
- Established secure REST APIs in Express.js to handle complaint creation, status updates, and administrative actions.
- Configured role-based access control to restrict dashboard functionality by user type.
- Designed MongoDB schemas for users, complaints, and admin logs using MVC architecture for maintainable backend design.

CERTIFICATIONS

- Advanced Software Engineering Job Simulation
- Solutions Architecture Job Simulation
- Responsive Web Design Developer Certification

TECHNICAL HIGHLIGHTS

- Hands-on experience integrating REST APIs with JWT and Firebase Authentication for secure access control.
- Skilled in MongoDB schema design, query optimization, and structuring scalable backend architecture.
- Strong grasp of Object-Oriented Programming and Data Structures & Algorithms applied to efficient problem solving.
- Solved 185+ DSA problems on LeetCode spanning Arrays, Strings, Linked Lists, Trees .
- Comfortable debugging issues across frontend, backend, and database layers using structured troubleshooting approaches.
- Follows software engineering best practices, including modular code design, version control workflows, and API-first development.
